## Supporting Students' SEL & Mental Health During COVID-19: Best Practices from the Field

June 4, 2020 ● 3:00PM-4:30PM ET

### Description

The spread of COVID-19 and related school closures have created unprecedented levels of stress, anxiety, and sadness among students, their families, and school staff. In the past two months, school personnel have gone to extraordinary lengths to support the social and emotional needs of their students in compassionate and creative ways. This webinar will highlight some of the lessons learned and best practices from these experiences, with an eye toward the long-term supports that students may need throughout the summer and into the fall.

The webinar will provide an interactive forum for participants to share challenges, opportunities, and ideas with one another. Content will be informed by the Multi-Tiered System of Supports (MTSS) framework, designed to help districts establish comprehensive social and emotional learning and mental health approaches for all students, families and teachers.

### Speakers
