About NSF and what we fund

National Science Foundation's Mission

“To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense...”

NATIONAL SCIENCE FOUNDATION

The US National Science Foundation

- US government agency, funded by tax dollars
- Funds, but doesn't do, scientific research
- Reports to the National Science Board, 24 scientists appointed by the President and confirmed by the Senate

Organization of NSF

- NSF funds research and development in all fields of science, technology, engineering and math (STEM)
- NSF is organized into Directorates (like colleges in a university) and Divisions (like departments)
- NSF funds a variety of R&D project in STEM education

Education and technology at NSF

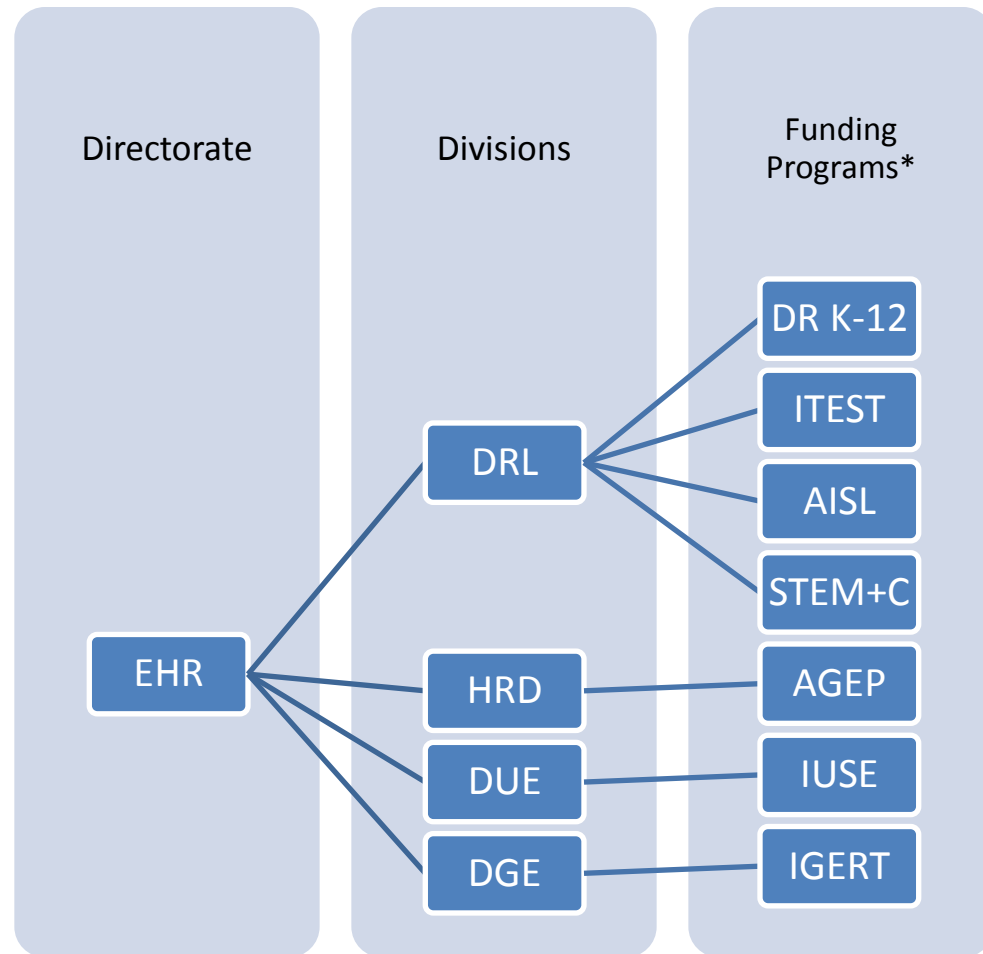

- **Education and Human Resources**
 - Research, development, and implementation supporting STEM education in the US at all ages (including research on broadening participation in STEM, learning and learning environments, and STEM workforce)
- **Social, Behavioral & Economic Sciences**
 - Research in social science (psych, neuro, anthro, etc.) which may include learning research
- **Computer & Information Sciences & Engineering**
 - Research on developing and studying new technologies, including learning technologies, *plus* some programs related to educating computer scientists
- **Other directorates**
 - May have projects on using technologies in education in their respective disciplines

Education and Human Resources

Mission:

To enable ***excellence in U.S. STEM education*** at all levels and in all settings in order to support the development of ***a diverse and well-prepared workforce*** of scientists, technicians, engineers, mathematicians, and educators.

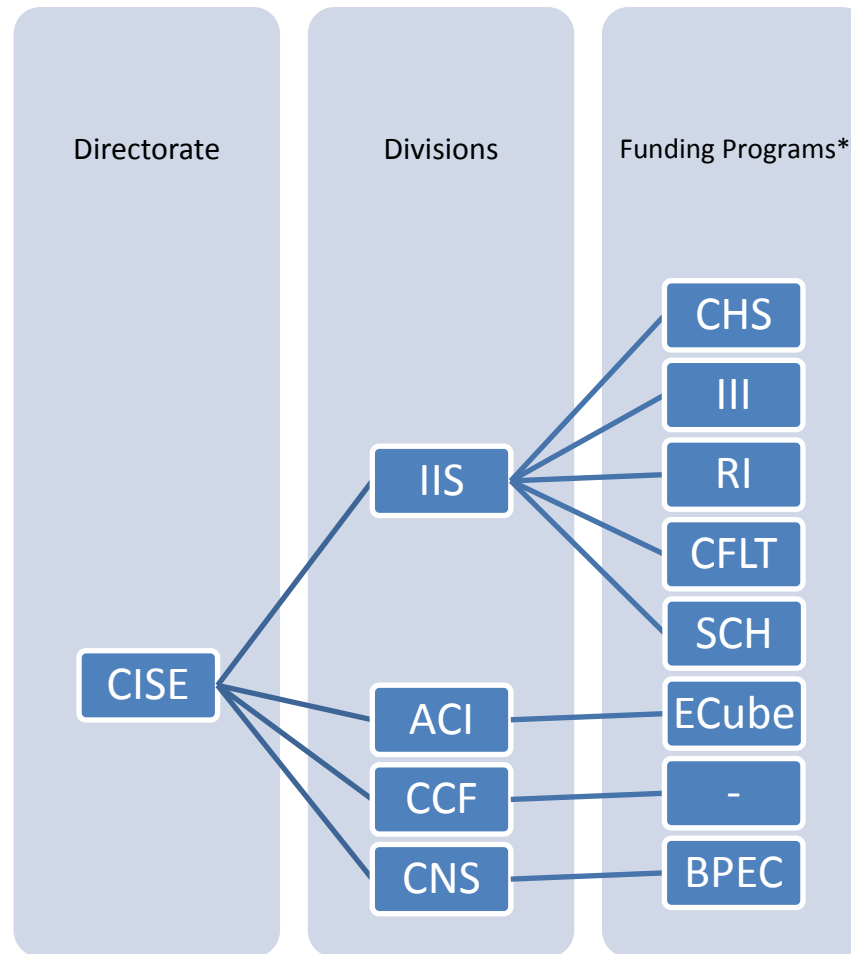

★ This is for demonstration.
Not all programs are listed.

Computer & Information Sciences & Engineering

Mission:

To enable
excellence in U.S. STEM education at all levels and in all settings in order to support the development of *a diverse and well-prepared workforce* of scientists, technicians, engineers, mathematicians, and educators.

★ This is for demonstration.
Not all programs are listed.

Contrasting education & cyberlearning at NSF with other agencies

- NSF's mission does not include clinical health research or education, although it can include basic research relevant to health (try NIH)
- NSF's mission does not give us primary responsibility for educational implementation in the US (this is primarily a state responsibility, or US Department of Education).
- We support commercialization of research in some of our programs, but we are not a venture capital fund, and we definitely don't support commercial ventures with no relation to research

How NSF evaluates proposals

- Submissions are made to specific calls (program announcements, program solicitations) or via our general Grants Proposal Guide
- Proposals that follow the submission guidelines are peer reviewed according to National Science Board Criteria*
- We fund a small proportion of proposals (typically 5-15% of those submitted)

Important rules for newcomers

- Read the *Grants Proposal Guide* and follow it
- Your proposal has to come through an eligible institution (typically a university or non-profit)
- Don't send in the same proposal multiple times
- Ask questions if you have them
- Consider resubmission with changes from feedback from earlier proposals, but note that all submissions are reviewed from scratch

The submitter's three jobs

- Identify the right funding opportunity
- Conceptualize a fantastic project
- Write a persuasive proposal in 15 pages

Research on Learning in Formal and Informal Settings (DRL)

EHR has established a new **Research Program**. Proposals are encouraged that help synthesize, build and/or expand research foundations in four core areas. See the announcement at:

DUE DATES

Full Proposal Deadline Date: February 11, 2014

Full Proposal Deadline Date: November 6, 2014

Some important notes

- Solicitations come and go. Some are multi-year, some are not but recur anyhow, many change names
- Solicitations will always have a minimum of 90 days to submit but may not have more
- Most solicitations follow the fiscal year, due in late fall or spring
- Just because NSF has funded a certain kind of work in the past doesn't mean we have money for it in the future
